Genetec Awarded Mercury Security Platinum Premier Status

On-going commitment to innovative access control integrations earns Genetec highest possible partner status from Mercury Security

MONTRÉAL, February 7 2019—Genetec Inc. ("Genetec"), a leading technology provider of unified security, public safety, operations, and business intelligence solutions announced that Mercury Security part of HID Global, the global leader in OEM access control technology, awarded Genetec the highest level in their partner program, Platinum Premier. The Platinum Premier status recognizes Mercury's select business partners who demonstrate continued market growth, strong integration with Mercury solutions, and shared interest in the open architecture approach to access control.

"As a Mercury Security partner and reseller since 2014, we take pride in having achieved Platinum Premier status in just a few short years. Mercury is a key partner in the development of our access control strategy as we are aligned in our efforts to provide innovative and cyber-secure access control solutions based on an open architecture," said Georges Tannous, Director of Strategic Alliances at Genetec.

"Genetec has demonstrated significant growth with the Mercury brand of products over the last several years. This growth coupled with their continued investment in the open platform philosophy drove the well-earned recognition as a Platinum Premier partner. We look forward to working together with the Genetec team to deliver open, scalable and secure solutions to our collective end users.," said Matt Barnette, Vice President at Mercury.

According to the 2017-2018 Access Control Intelligence Database by IHS, Genetec has rapidly risen to become one of the leading developers of access control software with a top-5 ranking in the Americas and a stronger global market share growth.

About Genetec
Genetec Inc. is an innovative technology company with a broad solutions portfolio that encompasses security, intelligence, and operations. The company's flagship product, Security Center, is an open-architecture platform that unifies IP-based video surveillance, access control, automatic license plate recognition (ANPR), communications, and analytics. Genetec also develops cloud-based solutions and services designed to improve security, and contribute new levels of operational intelligence for governments, enterprises, transport, and the communities in which we live. Founded in 1997, and headquartered in Montreal, Canada, Genetec serves its global customers via an extensive network of resellers, integrators, certified channel partners, and consultants in over 80 countries.
