Course Summary

Genetec API & SDK suite	
Code	API-SDK
Duration	Custom (Instructor-led)
Target audience	Developers using or planning on using the Genetec API and SDK packages
Prerequisites	Be part of the Genetec Development Acceleration Program and have a valid Silver or Gold technical assistance plan. Be familiar with C# and .NET and have significant coding experience. An internet connection, your own PC, and relevant Genetec products installed. Basic Security Center 5.x technical certification (SC-OTC-001 and/SC-STC-001) is recommended.
Objectives	Become more familiar with the Genetec API and SDK in order to develop better, more complete integrations, using the Genetec development best practices. The topics covered are tailored to your needs and the course is adjusted to your developers' experience with our products. Visit the API and SDK Training brochure here.
Certification	This class does not lead to a certification, but hands-on exercises will be provided with the API and SDK packages to practice the presented notions.
Contact	For more information about the API and SDK training options or to plan a training, contact DAP@genetec.com.
